

CASE STUDY

MobiAssist

What is MOBIASSIST?

Use one solution for all smart phones, netbooks, laptops, desktops, Barcode / RFID scanners, and even servers at one price, with no extra add-ons or modules to purchase.

Advanced remote control technology enables technicians to support End-user devices, as if they were in their own hands, to quickly and easily resolve issues. Reduce device returns and ensure your mobile Users are maximizing their productivity, not troubleshooting problems

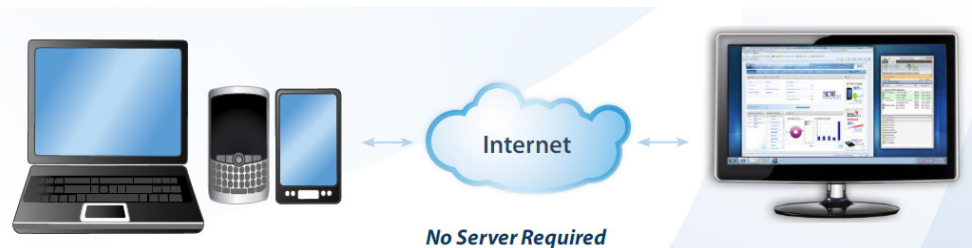

Solutions MobiAssist provides

Stage devices; we can remotely stage a device with details provided from the customer.

Trouble shooting; Using MobiControl we can remotely access a device to resolve issues customers may have.

Training; We can walk through staging/ updating and problem solving without being in the room

Customers can purchase the license key from us and then we can remotely fix problems / perform updates etc
